

SaveTheCampbell.com Campaign

Add My Name as a Petition Signer at SaveTheCampbell.com here:

<https://savethecampbell.com/add-my-name-to-petitions/>

Add your name and ask all of your Ottawa County friends, neighbors and contacts to add their names.

Support our Local Control Plan to stop the closure and demolition of Ottawa County's J.H. Campbell Generating Plant in May 2025. This plant provides electric for 1 million regional residents. Offlining it now when the grid is already at high risk is irresponsible. The State pressured this premature closure. The consumer citizens are also stuck with high energy costs in demolishing and replacing the Campbell plant with alternatives.

In order to save the Campbell, we need enough Ottawa County citizens to sign this petition that will put the charter question on the ballot. A county charter will allow the county to gain local control and stop the closure and demolition of the Campbell plant. The same local control charter can be beneficially used for a host of other issues, like getting back local control over zoning so our farmlands are not wasted and ruined by Chinese-made solar panels with toxic chemicals.

How do we get 12,000+ signatures for these 2 petitions for reliable, affordable, environmental electric via local control?

Each of us should go to SaveTheCampbell.com and select the menu option at top "Add My Name as Petition Signer". We started with 100 Petition Signers. Now we are heading towards 400 people by finding friends to be petition signers. And then we supporters repeat that a few more times by asking other friends, neighbors and contacts to sign:

$100 \times 4 = 400$

$400 \times 4 = 1600$

$1600 \times 4 = 6400$

$6400 \times 4 = 25600$

In other words, in 4 rounds of this we can get significantly beyond where we need to be in number of petitioner signers by each of us doing our share. Working together and looking to God for blessing is the path to success.

"Give unto the LORD the glory due unto his name" – Psalm 29:2
