

Some Questions All In Ottawa County Should Be Asking

What happens to a regional electric grid already at an elevated risk level if they close and demolish the Campbell plant, which provides electric for 1 million regional residents?

Why not support the "Save The Campbell" effort which works to address the issue by stopping the planned 2025 closure and demolition of the Campbell plant?

But if you do not like the "Save The Campbell" effort, what viable alternative solution are you supporting and helping?
