

# CONSUMERS ENERGY AND THE NET ZERO AGENDA ARE VERY EXPENSIVE

‘Cheap’ solar and wind is a lie, green countries pay more!

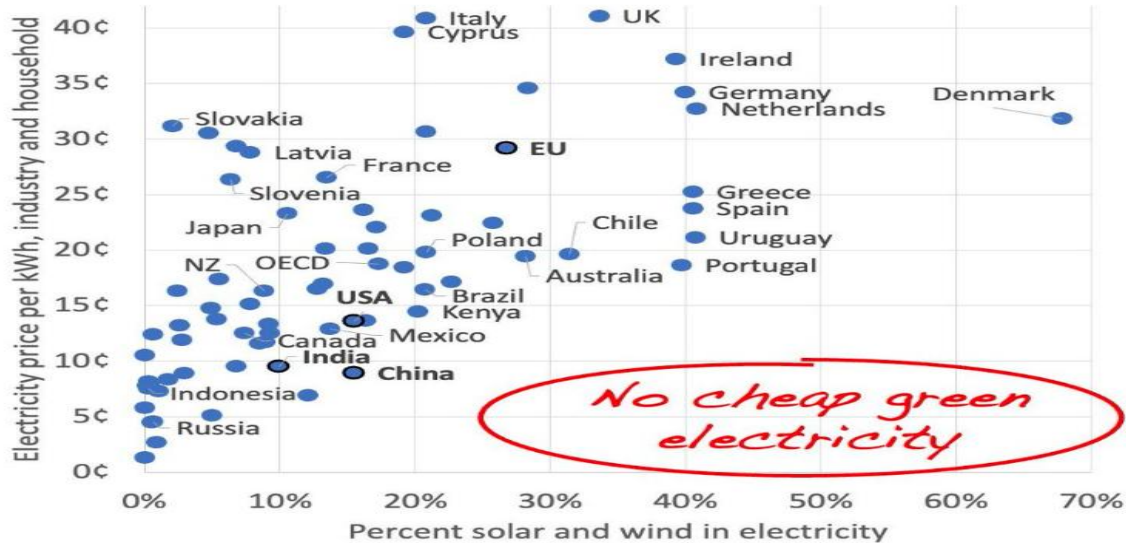

## Expensive Solar and Wind

You are constantly told that solar and wind are cheap

Reality: The more solar and wind, the costlier it gets

That is because solar and wind are worthless when not sunny and windy

Data for 2023, but same result for 2019, just before Covid and Ukraine war
